## Objective

Aspiring computer science professional passionate about environmental innovation and national development. I aim to contribute my skills to the Forestry Department of Jamaica by supporting sustainable initiatives through digital transformation, data management, and smart technology solutions. With a strong foundation in programming and creative problemsolving, I am ready to be of significance in advancing Jamaica's environmental goals.

## Education

University of Technology, Jamaica

Bachelor of Science in Computer Science

September 2024 – Present

Central High School

6th Form

September 2022 – June 2023

- Completed 3 CAPE subjects.
- Denbigh High School

CSEC Diploma

September 2016 – June 2022

- Achieved 7 CSEC subjects including Integrated Science.
- 

## Core Skills

- Proficient in Python, Java, and C++

- Strong analytical thinking and structured problem-solving
  - Academic experience in software development and database systems
  - Effective communicator and collaborative team player
  - Self-driven and adaptable to new environments and challenges
  - Proficient in Microsoft Office Suite (Word, Excel, PowerPoint, Outlook)
  - File management and digital organization
- 

## Experience & Personal Projects

Though early in my professional journey, I have completed several freelance and academic projects that reflect my technical abilities and initiative. From building software tools to managing data sets, I am eager to apply these skills toward meaningful environmental work—especially in areas like digital mapping, environmental tracking, and public awareness systems for the Forestry Department.
